

You are invited to the Hydrogen Station Grand Opening

Missouri University of Science and Technology is proud to invite you to celebrate with us the opening of a hydrogen fuel station and a ribbon cutting for the facilities supporting a new student competition called EcoCAR Challenge. Our partners in this venture are the Defense Logistics Agency, US Department of Transportation Research Innovation and Technology Administration, US Department of Energy, Missouri Transportation Institute, Gas Technologies Institute, EmPower CES LLC, Collegiate Station and General Motors. See <http://h2miner.mst.edu/>

Ceremonies on Tuesday August 19th begin at 10:30am at 900 Collegiate Boulevard Rolla (exit 185 from Interstate 44 then north to the round about and east on White Columns Drive). Please join us for the ribbon-cuttings, the public displays of hydrogen transportation technologies and an on-site picnic.

The hydrogen station, the first in Missouri, supports the project 'Show Me the Road to Hydrogen' and marks the beginning infrastructure to accommodate a new, very clean and very green, fuel that complements Missouri's efforts in biofuels and environmental leadership. And EcoCAR Challenge pits the bright minds at Rolla against the formidable tests of transforming a brand new Saturn Vue to new technologies. See <http://www.ecocarchallenge.org/>

Come join us for the

Ceremonies on Tuesday August 19th begin at 10:30am at 900 Collegiate Boulevard Rolla (exit 185 from Interstate 44 then north to the round about and east on White Columns Drive).

Do you believe it, 2009 is 15 years for St. Louis Clean Cities!

Put on your thinking caps. We need to designate our Clean Cities for the next 5 years and I need your help. We need a location, we need all of you to sign up as stakeholders and we need to recruit new stakeholders.

I need help with location? Type of event? Are we going to do an evening event? Day event? Want to include spouses? Music? Do we want to do an Expo and workshops and include the re-designation with that? What time of year do we want this? Spring, Summer, Fall? November is when we signed our first letter to be a Clean City.

So folks, I am looking for a committee that wants to help take this project on, any volunteers?

[We also have Odyssey October 3, 2008](#)

Looking for ideas and help with this event too
